ATMOSPHERIC RESEARCH

Contents Volume 38, 1995

The Helmut Wieckmann memorial
A.W. Hogan 1
The problem of hail suppression as seen by Helmut Weickmann
J. Dessens 3
An experimental study of aerosol scavenging by hexagonal plate ice crystals
D.A. Bell and C.P.R. Saunders 9
On the parameterization of autoconversion. Effects of small-scale turbulent motions
G.G. Carrió and L. Levi 21
New RAMS cloud microphysics parameterization Part I: the single-moment scheme
R.L. Walko, W.R. Cotton, M.P. Meyers and J.Y. Harrington 29
Quantitative descriptions of ice formation mechanisms of silver iodide-type aerosols
P.J. DeMott 63
The surface structure and properties of atmospheric ice crystals
N. Fukuta and Q.J. Lu 101
On the continuity and distribution of water substance in atmospheric circulations
E. Kessler 109
Impact of primary ice nucleation parameterizations on the formation and maintenance of cirrus
L. Levkov, M. Boin and B. Rockel 147
Surface temperature variations of gyrating hailstones and effects of pressure–temperature coupling on growth
R. List, B.J.W. Greenan and F. García-García 161
Development and propagation of precipitation cores on cold fronts
J.D. Locatelli, J.E. Martin and P.V. Hobbs 177
On the parameterization of ice microphysics in a mesoscale α weather forecast model
N. Mölders, M. Laube and G. Kramm 207
Calibration of a photoelectric cloud condensation nucleus counter
J.C.P. De Oliveira and G. Vali 237
Ice crystals in high clouds and contrails
F. Parungo 249
Large aerosol particles in cirrus type clouds
J. Podzimek, D.E. Hagen and E. Robb 263
The processing of water vapor and aerosols by atmospheric clouds, a global estimate
H.R. Pruppacher and R. Jaenicke 283
Condensed water in tropical cyclone "Oliver", 8 February 1993
R.F. Pueschel, D.A. Allen, C. Black, S. Faisant, G.V. Ferry, S.D. Howard, J.M. Livingston, J. Redemann, C.E. Sorenson and S. Verma 297
Effects of aging on the smoke from a large forest fire
L.F. Radke, A.S. Hegg, P.V. Hobbs and J.E. Penner 315
Microphysical characteristics of monsoon clouds and cloud sublayers as revealed by the MONEX aircraft observations
G.V. Rao and R.D. Tamin 333

Cloud condensation nuclei as a real source of ice forming nuclei in continental and marine air masses
J. Rosinski 351
Airborne radar and in-situ observations of a shallow stratus with drizzle
G. Vali, R.D. Kelly, A. Pazmany and R.E. McIntosh 361
Comparison of model results of collection efficiency of aerosol particles by individual water droplets and ice crystals in a subsaturated atmosphere
P.K. Wang and H. Lin 381
